

Prime Panels

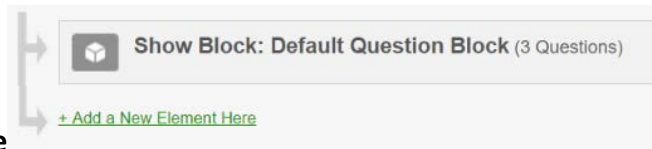

Qualtrics Study Setup

1. Capture a parameter representing a participants's assignment Id that TurkPrime passes to your study. This will add a unique participant ID to your data file.
2. Set up a redirect at the end of your survey to a TurkPrime URL. This ensures that only participants who completed your study will be paid.

1. How to capture the assignment Id

2. How to set the end of survey redirect

- a. Click **Add a New Element Here**

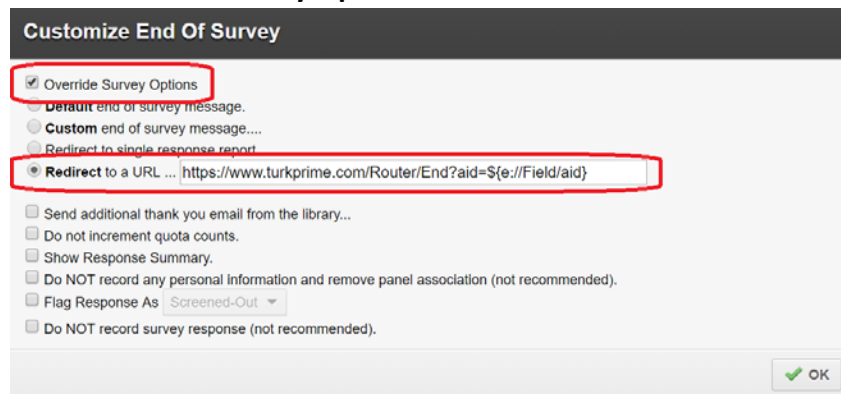

- b. Click on **End of Survey**

- c. Click on **Customize**

- d. Check **Override Survey Option**

- e.

Select **Redirect to a URL** and enter

`https://www.turkprime.com/Router/End?aid=${e://Field/aid}`

- f. Click **OK**

- g. Click **Save Flow**

Final Steps:

- Test your Qualtrics URL to verify that all is set up properly and you are capturing the **aid** in your data file.
 - In a browser, append to your Qualtrics URL **&aid=dummy**, and navigate there
For example: `https://myuniversity.qualtrics.com/SE/?SID=SV_3fm7en8I8agKR9z&aid=dummy`
 - Check your Qualtrics data file that it contains an **aid** that equals “dummy”
- Send your Qualtrics URL to TurkPrime to verify correct setup
- Your study will launch shortly after payment is remitted and will typically complete in a few days; often within the day
- In the event that participants completed your study and you want to reject their work, send their **aid**'s to TurkPrime within 7 days. New participants will be added to replace them, at no charge.
